INTRODUCTION

The conditions of the modern battlefield demand the most robust and reliable equipment. The Eugene Stoner designed AR15 and AR10 have been a key part of shaping the outcome of conflicts since its inception. As tactics evolve so has his design. After the dust has settled and the battles been won, it's clear that the dominating force wields a piston operated rifle.

We did not invent the AR15 but we made it a hell of a lot better. The Adams Arms proprietary operating systems mechanically actuate the bolt carrier external of the receiver. This keeps the internal receiver and all the critical moving parts clean and free from heat and carbon build up.

Here are some of the main differences when using the Adams Arms Operating System:

- Short Stroke Free Floating Piston System
- Self Cleaning
- Carbon and gases are expelled forward, away from the operator
- Bolt Carrier Group and other critical components remain cool and clean
- Corrosive resistant coating processes
- Harmonics are not transferred into the barrel
- Adjustable gas settings for various applications, such as suppressors, and subsonic ammunition
- Doesn't vent direct to atmospheric pressure; this eliminates flash signature and supersonic crack which is optimal for night vision and suppressed fire

P1 5.56 16"

OUR DIFFERENCE

- Lifetime Warranty
- Manufactured in the USA.
- Short-Stroke, Free Floating Piston System.
- Harmonics Not Transferred into Barrel.
- Self Cleaning.
- Carbon & Gases Expelled Forward (Away From the Shooter)
- Bolt Carrier Group & Other Critical Parts Remain Clean & Cool.
- Adjustable Gas Settings for Various Applications
- Most Technologically Advanced Coating Processes
- Corrosive Resistant
- Preserves Integrity of Night Vision

SKU-FGAA-00424 LE SPECIFICATIONS

- Forged 7075-T6 Lower Receiver, Type III Class II Hard-coat anodized finish, beveled magwell
- Forged 7075-T6 Upper Receiver, Type III Class II Hard-coat anodized finish, 1913 Picatinny rail flat top with dry lube internal finish and laser engraved T-markings
- Chambered 5.56x45 NATO
- 16" Melonited Barrel
- M4 Style Handguards
- Mil-Spec Trigger
- A2 Grip
- M4 6-Position Adjustable Stock
- Standard Picatinny Adjustable Block (3 Settings)
- A2 Flash Hider
- Weight: 6.2 lbs
- OAL: 32.5" collapsed
- Does not include rifle bag
- Optional Accessories: Optics, stocks, Suppressors, slings, lights, furniture, muzzle devices
