We didn't invent the AR15, we just made it better...

Adams Arms has transformed the AR platform finally making it into a clean, cool, reliable firearm.

Our Mission is to meet the engineering and design needs that will further the capabilities of the AR-15 platform through machining ingenuity, coating processes, and design.

- Lifetime Transferable Warranty
- Patented piston system
- Highest quality materials
- Keeps critical components cleaner and drastically reduces wear
- Extends the life of your rifle.

Shoot more, clean less!

A detailed close-up photograph of a black metal piston assembly. The piston is oriented diagonally from the top-left towards the bottom-right. It features a coiled spring at the top and a black band with the text "ADAMS ARMS" in orange. Engraved on the piston body are the specifications "ADAMS ARMS 5.56x45 1/7 4150 CI". The background is a dark, out-of-focus grey.

We began with a patented piston design that vastly improves the operating system of the AR platform.

MADE IN THE U.S.A.

Proudly Manufactured and Assembled
in Brooksville, Florida

Our difference:

- Adjustable gas settings
- Carbon and gases are expelled forward
- Critical components remain cool and clean
- All parts have a corrosive-resistant coating
- Optimal for night vision and suppressed fire
- Short-stroke, free-floating piston system

Lifetime Transferable Warranty

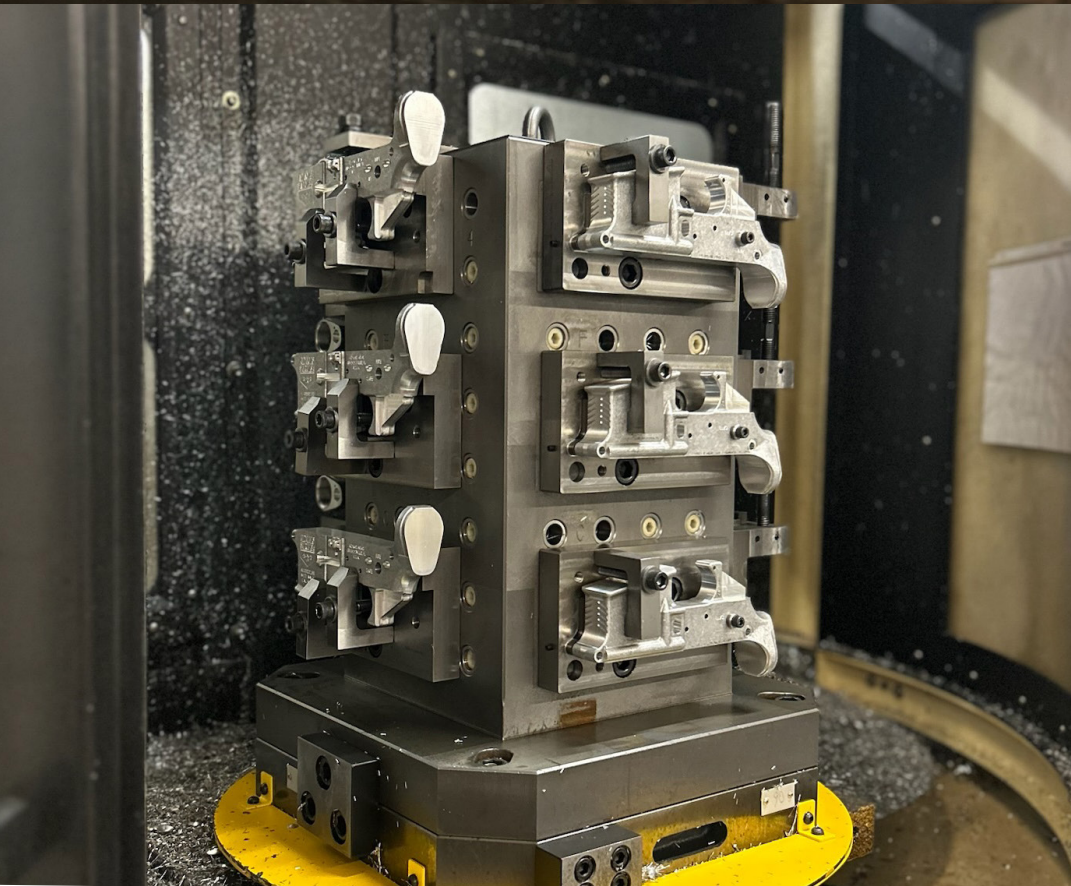

*We manufacture to the
highest industry
standards*

It all starts with the best materials and comes
together using top of the line equipment and
world class machine operators

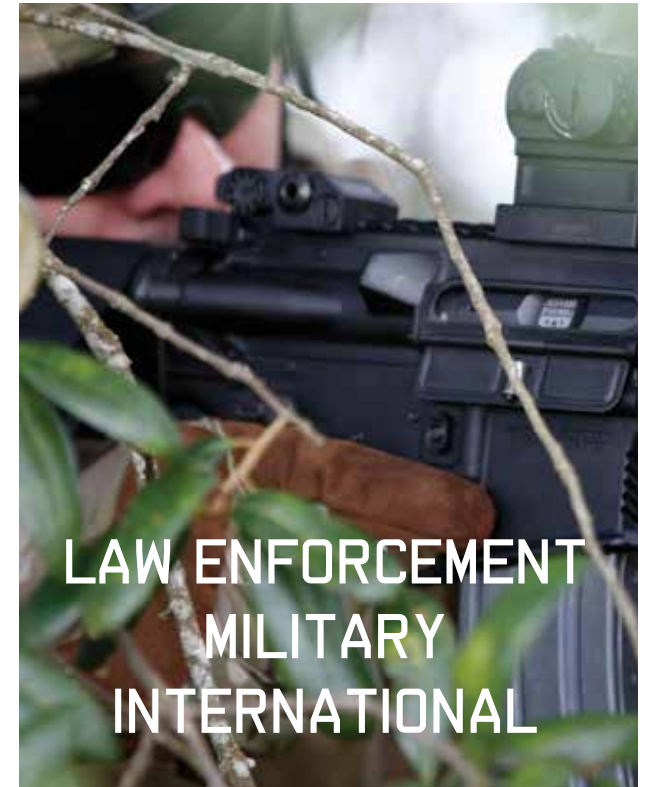

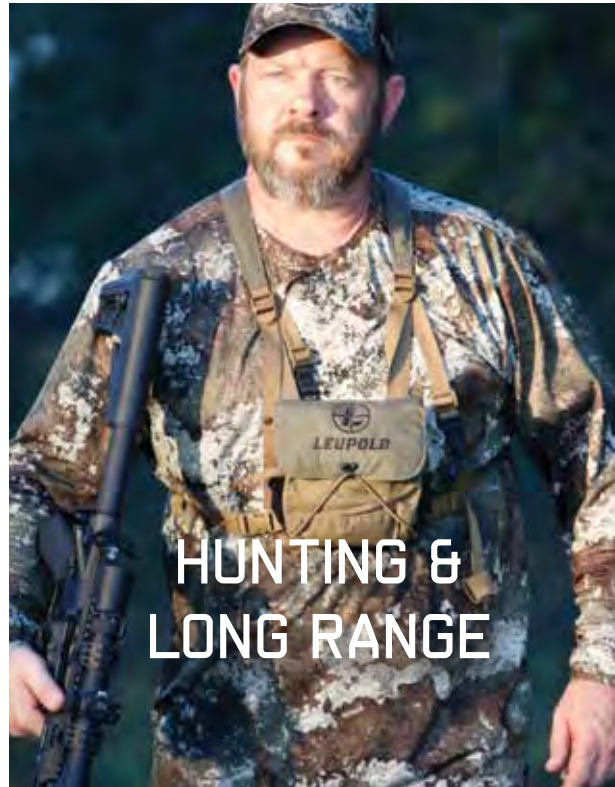

Every part is inspected and tested throughout the process

Whether it be our:

- Receivers
- Bolt carriers
- Bolts
- Hand guards
- Barrels
- Gas blocks
- Selectors
- Drive rods
- Muzzle devices
- More...

P SERIES

The Adams Arms P1 is the anchor of the P-Series. The P1 model is built with the Standard Picatinny Adjustable Block piston system, a M4 style stock, an A2 grip, and a standard trigger guard. The P1 MOE model includes Magpul MOE hand guards, stock, and grip, with the Standard Picatinny Adjustable Gas Block piston system. The P1 and P1 MOE are perfect for anyone looking for a self-cleaning, piston driven rifle that provides superior performance.

Piston 16" BRL w/ Magpul MOE Furniture & A2 Flash Hider

P1 MOE Small Frame Semi-Auto .308 WIN Mid Length
Adjustable Gas Piston 16" BRL w/ Magpul MOE Furniture & A2
Flash Hider

The Adams Arms P2 model is the tactical, battle-ready model in the P-Series lineup. The P2 guns include ergonomic free float rails that cover the P-Series Micro Block piston systems. The P2s come with flip-up sights, RISE Armament RAVE 140 trigger, a flash hider, an ambidextrous safety selector and charging handle, an angled pistol grip, as well as a tactical stock with QD mounts. The P2 is mission ready, off-the-shelf, and is easily configurable to suit your needs.

P2 AR-15 300 AAC Blackout Pistol Length Adjustable Gas Piston 16" BRL w/ AARS M-LOK Rail System & A2 Flash Hider

P2 Small Frame Semi-Auto .308 WIN Mid Length Adjustable Gas Piston 16" BRL w/ AARS M-LOK Rail System & A2 Flash Hider

P2 AR-15 5.56x45mm NATO Mid Length Adjustable Gas Piston 16" BRL w/ AARS M-LOK Rail System & A2 Flash Hider

P2 Small Frame Semi-Auto 6.5 Creedmoor Rifle Length Adjustable Gas Piston 18" BRL w/ AARS M-LOK Rail System & A2 Flash Hider

P2 AR-15 5.56x45mm NATO Pistol Length Adjustable Gas Piston 7.5" BRL w/ AARS M-LOK Rail System & A2 Flash Hider

P2 Small Frame Semi-Auto .308 WIN Carbine Length 12.5" BRL w/ AARS M-LOK Rail System & A2 Flash Hider

P2 AR-15 5.56x45mm NATO Carbine Adjustable Gas Piston 11.5" BRL w/ AARS M-LOK Rail System & A2 Flash Hider

P2 AR-15 300 AAC Blackout Pistol Length Adjustable Gas Piston 8" BRL w/ AARS M-LOK Rail System & A2 Flash Hider

P3 SERIES

The Adams Arms P3 is the match-grade performance model in the P-Series lineup. The P3 features a jet comp, an ergonomic free float rail, Proof Research Carbon fiber barrel, and our signature P-Series Micro Block piston system. This rifle is designed for avid shooters with its ambidextrous safety selector and charging handle. The P3 includes a Triggertech Diamond trigger, a rubber ergonomic grip, and an adjustable LUTH AR stock with cheek riser. This high-performance rifle is ready to compete at any level.

P SERIES | UPPERS

For those looking for more functionality for an existing lower or for the parts to complete a custom build, Adams Arms offers P1, P2, and P3 uppers.

P1 5.56

Available in 11.5" and 16"

P3 .223 Wylde

Available in 16"

P2 300BLK

Available in 8" & 16"

P2 5.56

Available in 7.5", 11.5", *16"

P1 MOE 5.56

Available in 11.5" and 16"

P3 300BLK

Available in 12.5"

P SERIES | PISTON KITS

Our revolutionary Retro-Fit Piston System converts a standard direct impingement rifle or AR pistol to a clean, cool, and reliable system without extensive modifications. The patented piston kit is a drop-in system that works on any Mil-Spec AR-15 and is compatible with most standard AR-15 parts. Our kits have been treated by various coating applications to increase durability, lubricity, and longevity, and have a lifetime warranty.

The Adams Arms Retro-Fit Piston System redirects gasses into a patented gas plug and drive rod cup instead of directing hot gas into the upper receiver. The gases are contained inside the drive rod, which cycles the action keeping hot gasses away from the operator.)

Micro Adjustable Piston Kit

Available in 5.56 or 300BLK

Adams Arms' proprietary operating systems mechanically actuate the bolt carrier from the outside of the receiver. The internal receiver and all the critical moving parts remain clean and free from heat and carbon build up.

All Kits Include:

Bolt Carrier, Drive Rod Assembly, Gas Block, and Bolt Spring

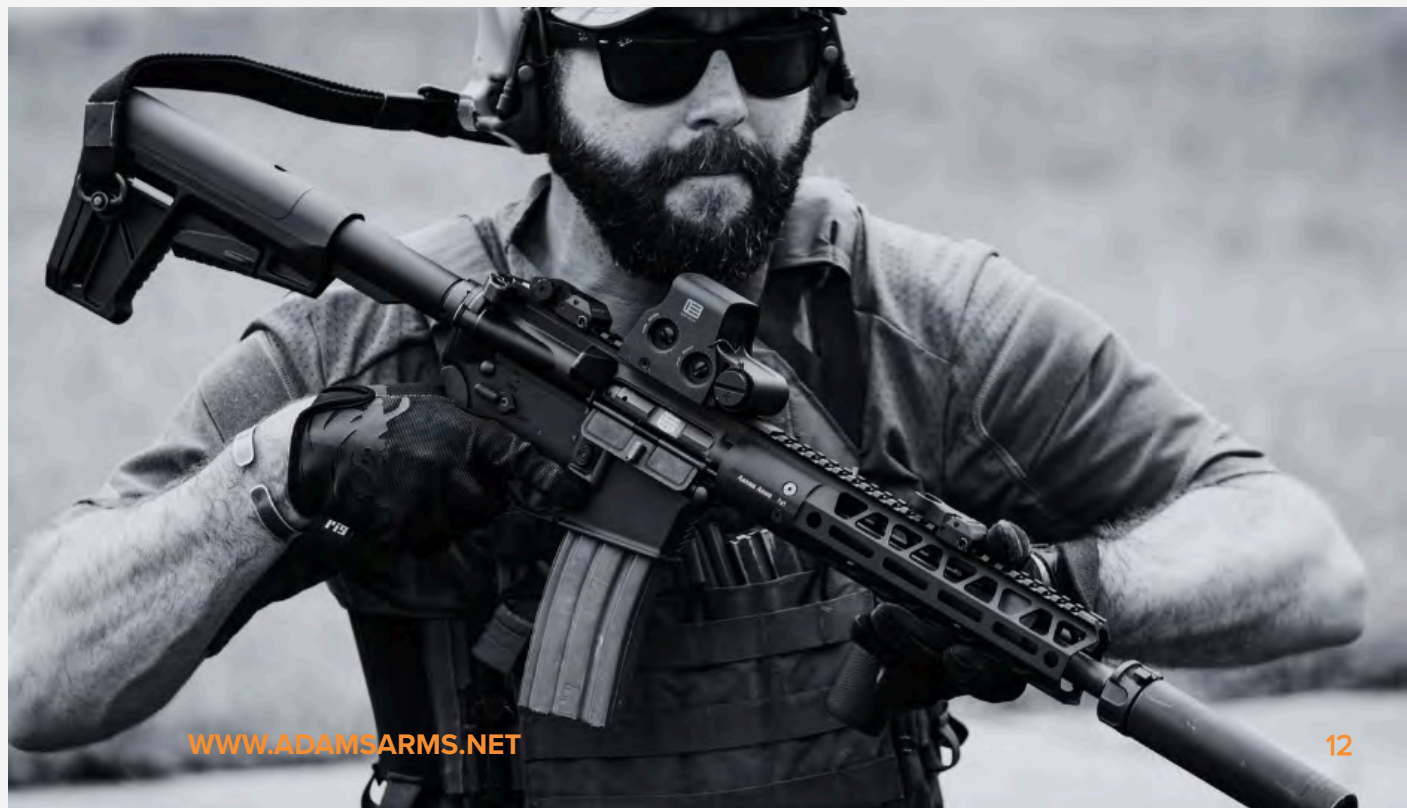

Piston Kit Options:

- Pistol, Carbine, Mid, or Rifle Length
- Standard or Low Mass Carrier
- 300BLK Specific Kit

Picatinny Adjustable Piston Kit
